TECHNICAL DATA

DAN DRYER® STAINLESS DESIGN touch-free dispenser for liquid soap or sanitizer, item no. 282-MEDIC

DAN DRYER introduces a new variant of soap and hand disinfectant dispenser. Designed for use in medical facilities, hospitals and nursing homes.

The dispenser has been tested with the most common cleaning agents used in the hospital sector, including chlorine. Made of stainless steel and featuring an easy-to-clean arched housing.

In case of fire the liquid stays encapsulated inside the dispenser. Thus, it can be installed at emergency exits (however, you should always consult the fire authorities).

Easy and quick to replace the liquid bag-in-box.

Featuring a safety lock to prevent the liquid being interfered with.

Suitable for installation in all types of toilets and facilities accessible to the public.
